

## ZIPPING FILE FOR UPLOAD IN ONLINE ENVIRONMENTAL REVIEW TOOL

You must have all of the components of the ESRI shapefile: .shx, .shp, .dbf, .prj. If any of these are missing, it won't upload. You cannot use a zip file generated through 7zip. The best way to create the zip file is to do the following:

Using the File Manager, select the files to be zipped

Right click and choose Send to -> Compressed (zipped) file

It will generate a zipped file of the same name in the same folder.
